EXPERIENCE

Willowtree, Charlottesville, VA — *Platform Software Engineer*

July 2022 - PRESENT

- Worked on implementing refactors for existing Native features within an account management app for a large telecom company. Aided in the integration of React Native into the existing Android app by developing a middleware SDK. On this project took on a leadership role to run stand ups, communicate with Program Leadership and manage work of junior developers.
- Collaborated closely with cross-functional teams, including designers and backend developers, in a complex banking application to fulfill new features such as rewards center for cardholders where I implemented the logic to filter local storage for user eligibility.
- Led knowledge transfers and created extensive documentation to onboard new team members, spoke at tech roundtables to present on client architecture.

Willowtree, Charlottesville, VA — *Software Engineer*

June 2021 - July 2022

- Contributed to the development and maintenance of a highly popular streaming app with over 3 million users. Successfully led a large-scale refactor to eliminate an alpha navigation library, resulting in improved app performance and reduced code complexity.
- Participated in many bug bashes and served PagerDuty demonstrating strong problem-solving skills by identifying and resolving critical issues and bugs, ensuring a seamless user experience.
- Created internal tooling projects, such as an email scraping Slack bot, to automate processes and enhance team efficiency by alerting team members about important onboarding emails, streamlining the onboarding process.
- Received a promotion within one year of employment, acknowledging outstanding contributions and dedication to project success. Managers specifically highlighted excellent communication skills and confidence in presenting ideas to clients.

EDUCATION

Grace Hopper Program at Fullstack Academy, New York *Certificate in Software Engineering*

January 2021 - April 2021
